Discussion:

- The attendees were introduced and the agenda was reviewed.
- Henry Heffernan provided status regarding the MDRIC progress reports. To date, he has received only one report completed in the new format (for the ITS Data Registry). Henry will send a copy of the progress report template to Genevieve Speier to post to the list serve. (Done 12/13/00) **The following progress reports should be completed and sent to Henry:**
 - **Genevieve Speier / USHIK**
 - **Carol Uri / FAA**
 - **Bruce Bargmeyer/ EPA**
 - **DoD HA /Dave Orris**

- **Census /Gail Wright**
- **XML Global /Dave Webber**
- **BLS /Jim Carpenter).**
- Frank Farance called in from Athens, Greece and did a slide presentation on conformance testing that Ft. Leavenworth is doing on the 11179-3 metadata registries. The ppt slides were sent to MDRIC list serve prior to the call. Dan Knapp gave a brief demonstration. **Dan will send an XML example to Bruce Bargmeyer for posting to the L8 reflector.**
- Dave Webber did a presentation on where ebXML stands and the relationship between ebXML and the 11179 metadata repository. **Dave will provide a copy of the slides for posting to the Coalition web site.** Dan Schneider suggested we invite GSA to speak on XML issues...
- Carol Uri presented FAA's plan to implement a 11179 metadata repository. FAA is using the Oracle Consulting Data element Solution developed for the Census. FAA has contracted with Burt Parker, to serve as their metadata registrar. **Carol will send Dave Webber the classification scheme** they developed for the FAA Registry. Dan Schneider wanted to know the cost. Carol said it was being done for under 300K because they have been able to leverage previous work that has been done.
- Bruce Abbott asked whether there are plans for another Open Forum. Bruce said Sante Fe was too expensive. There is a possibility of having one at Boeing ether before or after the WG2 meeting in Canada. May have two forums; a large 'grandiose' meeting (e.g. with WG2) and a smaller meeting (e.g., tutorials) in the DC area. We have outgrown BLS. Other possibilities for a site are NIST and the National Archives in College Park.
- **Branch Archer will post the minutes and associated handouts to the Coalition web site at <http://hmrha.hirs.osd.mil/mrc/>.**

Action Items:

Action Items appear in bold throughout this report.

Agenda Items Proposed for the Next Meeting:

- Gail Wright will provide an overview of the new release (v1.1) of the Census Data Element Registry.
- The participants will discuss the issues to be considered when embarking on a MDR implementation, including the necessary qualifications/job description for a Registrar.

The meeting adjourned at 4:30 PM.
